

Remote Control Technology
Designed for Total Comfort

Ambient 
TECHNOLOGIES®

**Ambient Technologies®,
offers a broad range of remote
controls and accessories designed
for total comfort and convenience.**

Ergonomic and slim design, ease of operation and soft-touch finish combine to enhance the comfort, luxury and convenience of any gas fireplace. Plus, our new line of touch screen remote controls offers you the latest control technology in the palm of your hand.

**To ensure product reliability, each remote
features a radio frequency operating system.**

Radio frequency allows for multiple security codes – which virtually eliminates interference from other home appliances such as televisions, DVDs and stereos – and each remote will operate at a maximum distance of 30 feet with no interference from objects between the user and the receiver.

**Innovative technology, advanced engineering
and a 20-step quality control program
produces the finest remote controls available
in the industry.**

Our remotes and accessories have been engineered for compatibility with ALL brands of gas fireplaces, logs, inserts and stoves in today's market and are fully warranted for 5 years.

**Our pledge for comfort and convenience
extends beyond the showroom.**

Top-notch technical support is automatically included as part of the package. Our toll-free number is staffed by knowledgeable technicians, ready to assist before, during and after installation so that customers can be totally comfortable when choosing Ambient Technologies®

Ambient 
TECHNOLOGIES®

Ambient Technologies®
Thermostat Remotes offer the following standard features:

- Childproof protection
- Thermal-safety shutdown (transmitter)
