

Grand Oak

The Hargrove Grand Oak offers the right combination of large and small logs to recreate the look of a traditional wood burning fire. These detailed logs create a distinguished richness and beauty. The logs are cast from real trees which were selected for their personality and deep bark texture. The ultimate in a fire that says it all.

- Vented gas log set
- Fresh cut appearance and deep bark detail
- See-Thru models available
- Natural gas and liquid propane applications

A Hargrove gas log set is a great way to turn an ordinary fireplace into warm feelings for a lifetime.

Hargrove craftsmen create the most realistic, most natural, most durable gas fire logs in the industry. Every Hargrove log is molded from an actual wood log and finished with up to six hand-painted colors. And, each log set has been carefully engineered to produce naturally realistic flickering flames and a glowing bed of embers, using either natural gas or liquid propane.

Grand Oak sets are offered in 16", 18", 21", 24", 27", 30", 36", 42" and 48" sizes, and See-Thru models. Available with RGA 2-72 certification, and in natural gas or liquid propane configurations. A variety of accessory options, including remote controls, wall switches, decorative pine cones, bark chip kits and hearth pads are also available.

Warm up to the convenience, cleanliness, safety and economy – plus the unmatched realism – of Hargrove gas log sets. See them for yourself at your local dealer.

GAS LOG Accessories

Ember Enhancing System – front burner attachment that extends the glowing coal ember bed forward. Fits sizes up to 36".

Pedestal Grate Facing – add a distinguished look to your gas log set. First sizes up to 30".

Pine Cones – accentuate your fireplace or hearth with decorative pine cones.

Crackling Pine Cone Kit – create the sounds of a real wood fire.

Bark Chip Kit – add beauty to the ember bed of your gas log set.

Glowing Embers – Hargrove's unique black-colored glowing embers look great when the log set is on or off.

GAS LOG Controls

Hargrove's Safety Pilot Control Systems offer the best in safety, convenience and reliability. The safety feature shuts off gas flow to the system if the pilot is extinguished and the valve body is optimally placed for long lasting performance. All Hargrove Pilot Control Systems are approved by CSA.

Manual Pilot Control System
Manual valve for on/off function; also shown optional latch-tap block to convert from manual to remote control operation.

Millivolt Pilot Control System
Comes standard with a wall switch.

Variable Pilot Control System
Includes remote control and servo motor to adjust flame height.

Optional Switching Accessories

Remote Control

Bark Chip Switch

Pine Cone Switch

HARGROVE SETS Include

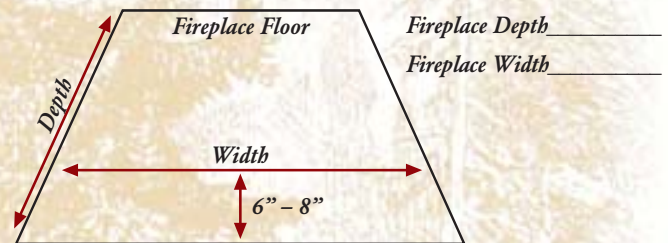

- Hand Finished Fire Logs, with authentic Hargrove detail and realism.
- Lifetime Warranty, Hargrove Gas Fire Logs carry a limited lifetime warranty against breakage in the original fireplace. All Accessories carry a two-year limited warranty in the original fireplace.
- Pedestal Grate, especially designed to place the logs in perfect position for the best flame pattern.
- Ember Burner Pan, heavy 16 gauge steel – the foundation for the burner media.
- Silica Sand, maximizes diffusion of natural gas. Vermiculite is used with propane.
- Embers, creates the illusion of a bed of glowing coals.
- Cinders, for the finished look of the fireplace floor.
- Connector, to join gas supply to the ember burner pan.
- Optional Safety Pilot Valve combines the convenience of on-off control with safety feature. Available factory assembled.
